Kattis is a platform **only for submitting questions and having them marked**. Your code should be written on your own devices (DevC++, Eclipse, VSCode, etc.).

As for submitting answers to the website, try to take some time on your own to practice. For example, do this question: <u>https://open.kattis.com/problems/hello</u>

Your code can either be uploaded as a file OR you can copy and paste your code into the space provided on the right of each question:

KATTIS	Problems / Helio Worldt	
	Hello World!	Edit & Submit Metadata Submissions Hide >
Problems		
<b>Q</b> Contests	Input There is no input for this problem.	
★ Challenge BETA	Output	Select your programming language of choice and start writing your code.
$ar{m \Psi}$ Ranklists	Output should contain one line, containing the string "Hello World!".	
(ii) Jobs		Start coding
i Info		
? Help		<b>土</b>
Search Kattis Q		You can also unload your files by drag & drop here or by browing your computer. Upload files
	Contact   System Status	Terms of Service   Privacy Policy

For Java users ONLY: The name of your class is the name of the question:

~	Problems / Hello World!
KATTIS	City's Edit & Submit Mendata Submissions Hide >
Problems	Hello World!
Q Contests	Input There is no input for this problem.
🛨 Challenge BETA	Output
$\Psi$ Ranklists	Output should contain one line, containing the string "Hello Wort fl".
